SUN WINNER

We are a leading European provider of system components as well as a manufacturer of aluminum patio pergolas and additional equipment such as WIN SCREEN ZIP external blinds, WIN GLASS tempered sliding glass systems, and aluminum shutters – WIN PANELS.

Our products stand out not only for their functionality and aesthetics but also for their durability and innovative solutions. Everything is created with passion by a team with extensive experience. A wide selection, premium quality, and unique design are just some of the attributes that distinguish our products.

As a company, we prioritize long-term and fruitful cooperation with our partners. We understand that the key to success lies in continuously developing our skills and gaining new experiences. Therefore, training is a very important aspect of our collaboration.

At the SUN WINNER Academy, we offer a wide range of training programs tailored to the individual needs of our partners.

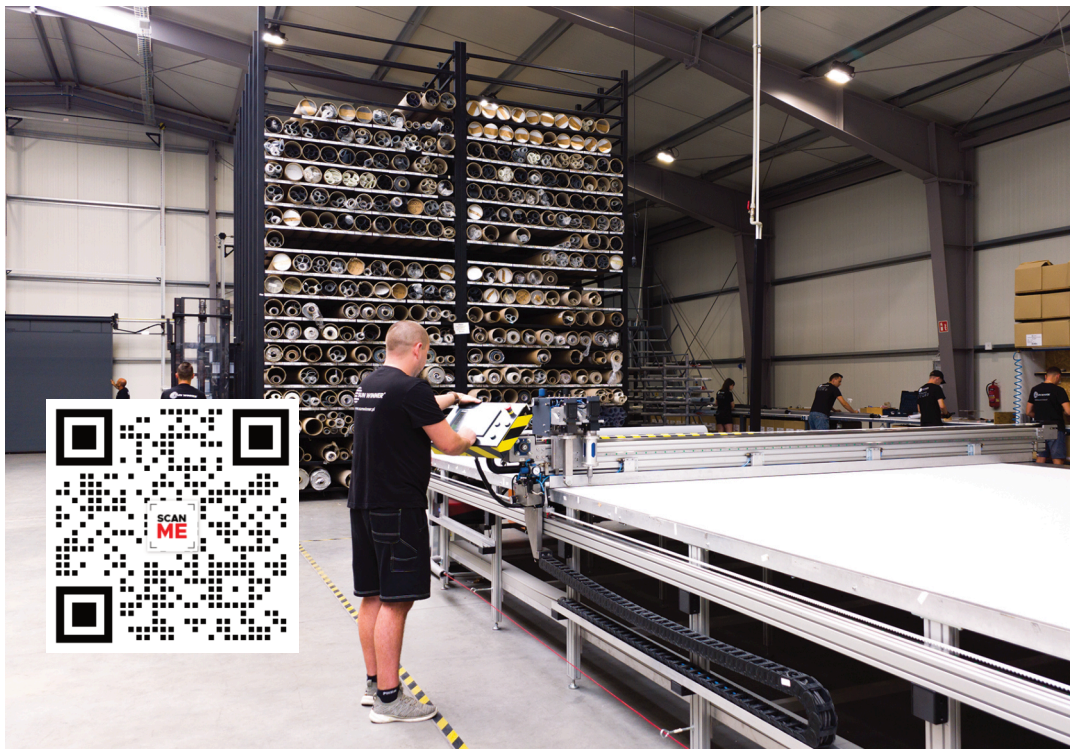

FOCUSED ON QUALITY

We use the highest quality components in our production process, and as a system provider, we maintain 100% control over the quality of the profiles and components used in our products. Thanks to modern solutions, we provide our customers with high-quality products that are exported to 30 countries. We are a company with numerous patents and inventions to our name.

Our products are CE certified, and we hold a certificate of conformity for factory production control.

At various stages of production, we utilize an advanced machinery park. In the preparation of top-quality products, we employ premium-grade equipment. This includes automatic plotters for screen and PVC fabrics, automatic impulse welders and air welders with a working length of up to 13.5 meters, automatic double-head saws, and automatic 4-axis CNC centers for aluminum processing. Every product undergoes thorough inspection before leaving our factory.

INVESTMENTS

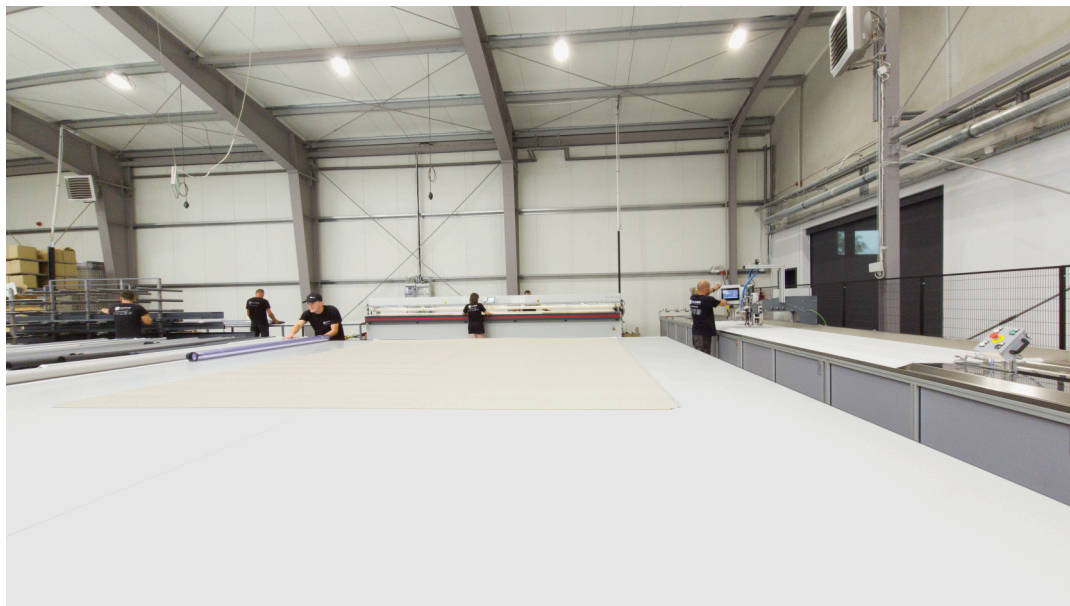

At the end of the year 2022, SUN WINNER GROUP joined the Suwałki Economic Zone and, with the support received, purchased a 13,000 square meter site for new investments.

Today, this site houses an office building, expanded with a training center for SUN WINNER GROUP Partners, as well as a warehouse and production space totaling 3,200 square meters.

Currently, the company operates both from the old and new locations, with the new one situated in Łomża at Poznańska Street 148A. The total production and warehouse space now exceeds 5,000 square meters.

We have a modern machinery park, which is continuously updated to meet the demands of a dynamically changing market and customer expectations.

Our own modern vehicle fleet enables us to transport products to the most distant locations in Europe and around the world.

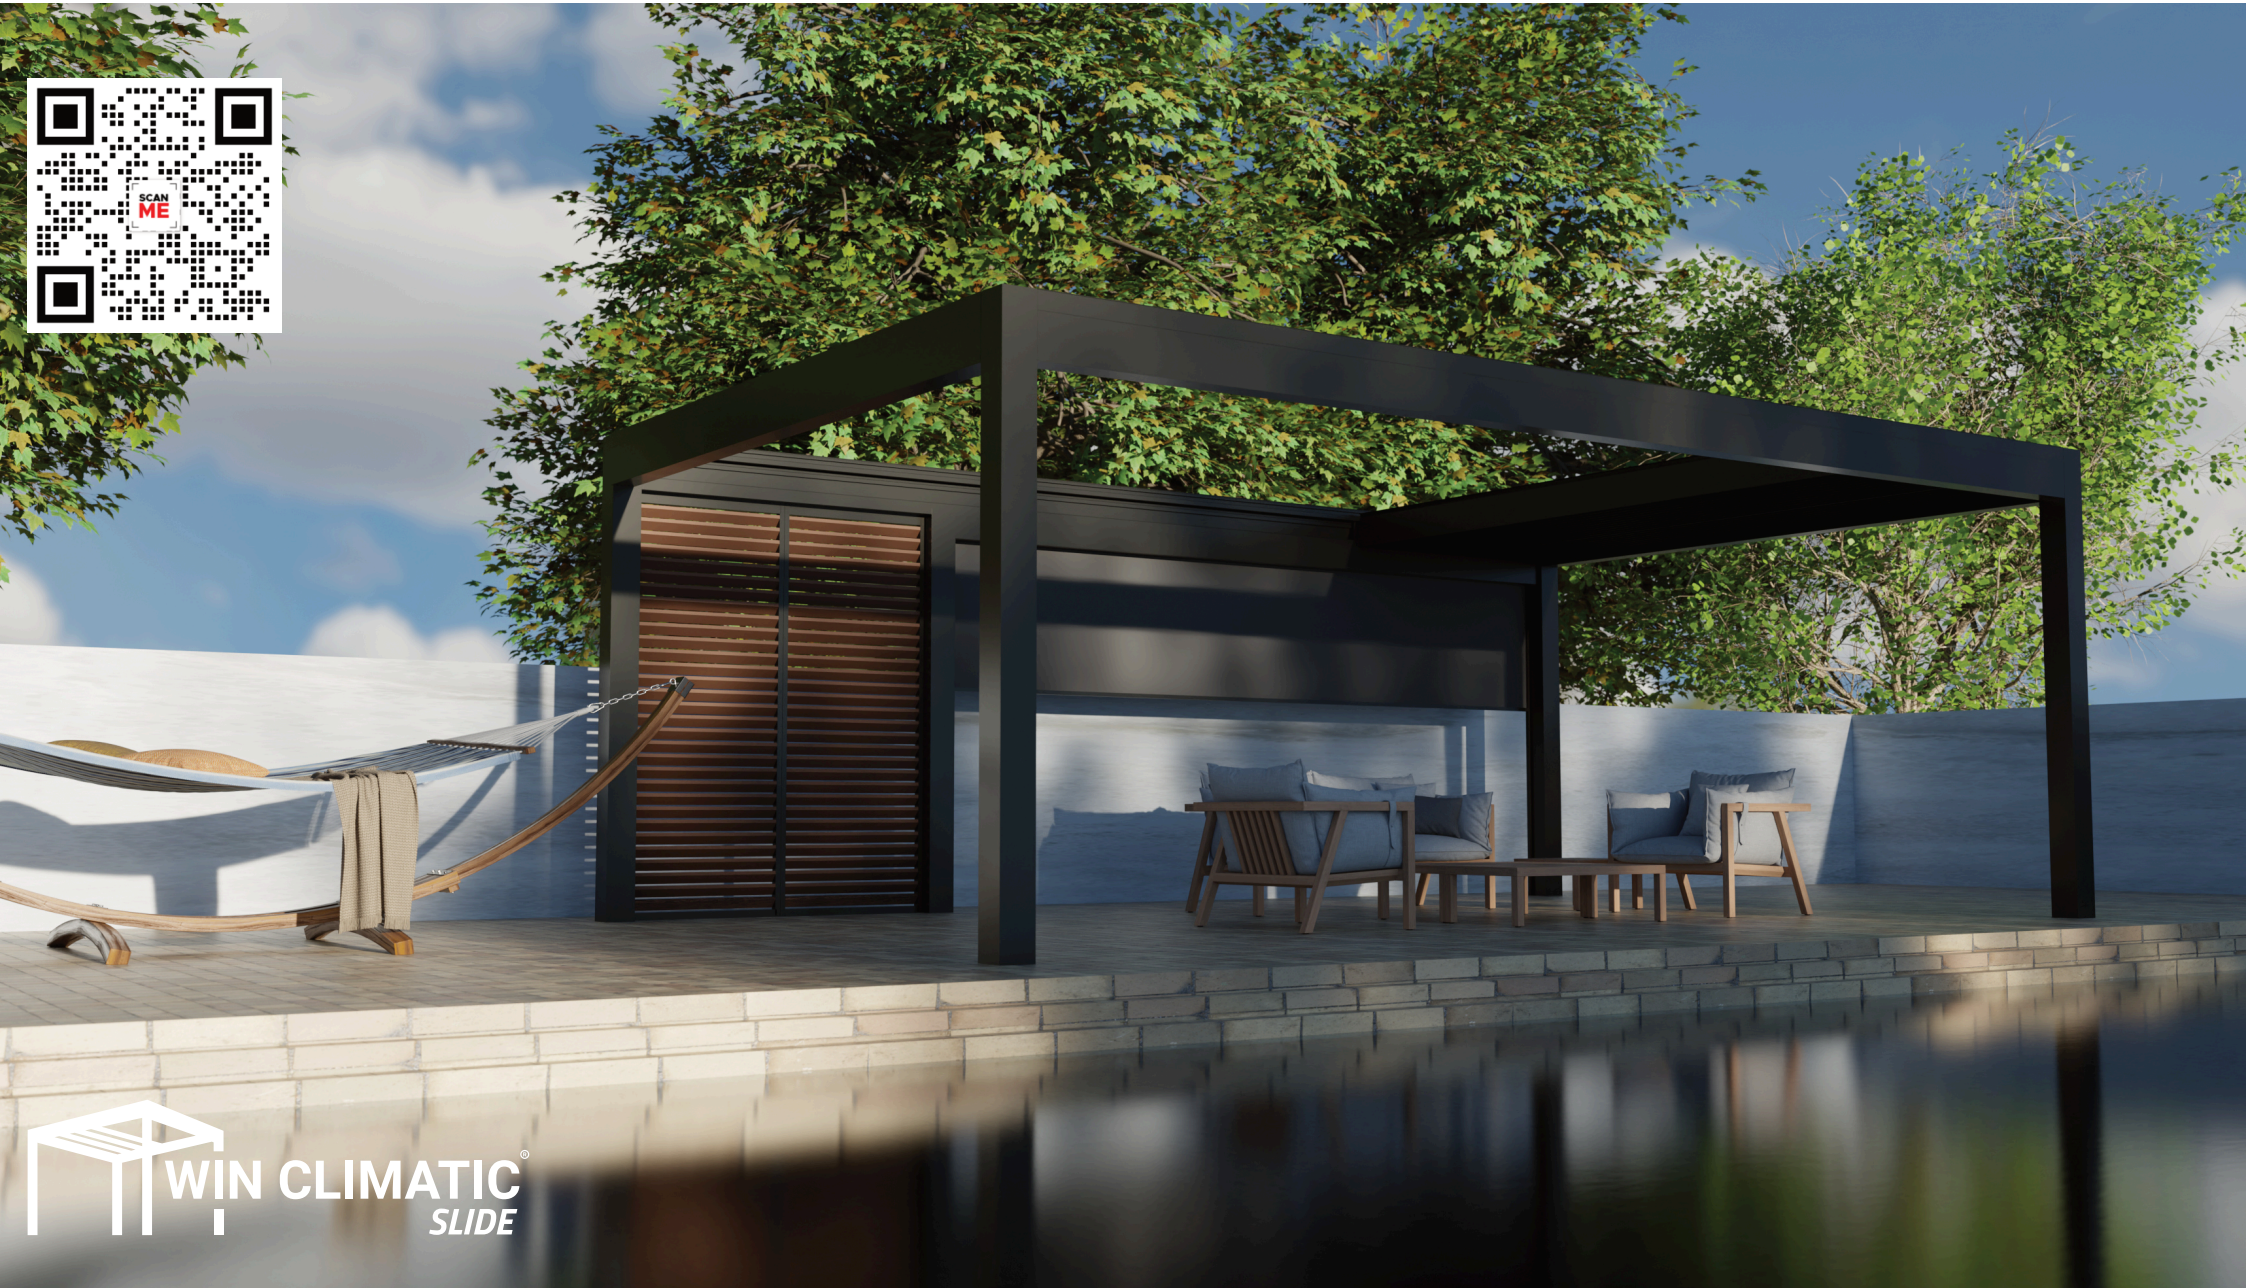

AWARDS AND CERTIFICATIONS

As a company, we continuously strive to elevate production standards to meet the market's dynamics and the demands of individual investors.

Thanks to the dedication of our technical department, we constantly refine our designs and introduce innovations that not only enhance the technical parameters of our products but also improve their appearance, aesthetics, and, most importantly, functionality.

SUN WINNER is the result of passion and years of persistent work in the pursuit of excellence.

 WIN CLIMATIC[®]
SLIDE

WIN CLIMATIC SLIDE is a fully automatic, innovative louvered pergola with a sliding roof.

The pergola's structure is made from durable, powder-coated extruded aluminum and stainless steel. We are the only manufacturer in Poland that offers this type of pergola.

WIN CLIMATIC SLIDE is an ideal solution not only for residential use but also for the HoReCa industry.

SNOW PROTECTION

OPTIONAL EQUIPMENT

The WIN CLIMATIC SLIDE structure can be equipped with side screens, weather automation, heaters, LED lighting, thermal insulation, or an integrated audio system. Discover all the advantages of the WIN CLIMATIC SLIDE pergola by scanning the code.

WIN CLIMATIC S500 is an unrivaled louvered pergola system, designed and created by SUN WINNER, with impressive dimensions and the largest size on the market!

SINGLE PERGOLA on two columns: 7000 mm x 5000 mm (35 m²)

SINGLE PERGOLA on three columns: 7750 mm x 5000 mm (38.75 m²)

BI-MODULE PERGOLA on two columns: 7000 mm x 7000 mm (49 m²)

WIN CLIMATIC S500 is the latest model in the SUN WINNER range. The S500 pergola is the most revolutionary and innovative fully automated terrace covering, made of durable powder-coated extruded aluminum and stainless steel. The pergola's impressive dimensions outperform the global leaders in pergola manufacturing, making our product unmatched in the market. The S500 model features **28 new patents**, including **8 original inventions** and **20 innovative profiles**. The roof of the pergola consists of aluminum louvers that rotate from 0° to 135°, allowing control of the amount of sunlight, and in the closed position, it provides protection against excessive sunlight and weather conditions.

WIN CLIMATIC S500 is the ideal solution for modern and demanding outdoor spaces, such as terraces and gardens, as well as commercial spaces like restaurant and hotel terraces.

WIN SCREEN®

WIN SCREEN®

WIN SCREEN - A modern shading product, mounted on the exterior side of a window or glass wall, similar to traditional external blinds or facade shutters. WIN SCREEN blinds primarily provide protection and a barrier against excessive sunlight and heating of windows, rooms, buildings, pergolas, and terraces.

By using our blinds, you can save up to 58% on cooling costs. WIN SCREEN blinds can reflect up to 95% of solar energy, thereby reducing the need for artificial lighting. Our blinds not only offer optimal visual and thermal comfort but also serve as protection against insects and wind, and are resistant to weather conditions.

UV PROTECTION

INSECT PROTECTION

WIND PROTECTION

WEATHER RESISTANT

The advantage of our WIN SCREEN blinds compared to other external shading solutions is the ability to cover large areas up to 7 meters in width and 6 meters in height, with a total maximum area of 27 m², while maintaining a compact box size. Scan the code to learn more about the screen blinds.

WIN GLASS - A system of sliding tempered glass panels characterized by its simple construction while maintaining exceptional functionality and aesthetic appeal. WIN GLASS offers an incredible combination of optimal visual and thermal comfort along with protection against external conditions.

Thanks to the use of 10 mm tempered glass and unique solutions, the system ensures safe use of terrace spaces, whether in a private setting or a commercial environment. A wide selection of accessories, frame colors, and glazing models ensures that WIN GLASS will seamlessly integrate

 WIN PANELS[®]

WIN PANELS / SHUTTERS

The WIN PANELS system of fixed or sliding aluminum panels combines style, functionality, and innovation.

WIN PANELS offer modern solutions and unique design.

WIN PANELS are a contemporary shading product, making it an ideal solution for pergolas, terrace roofing, and more.

WIN PANELS shutters provide additional protection against weather conditions, enhance privacy, and elevate the aesthetic appeal of any space with their stunning design. The use of adjustable louvers, which can be tilted from 0 to 90 degrees, offer additional control over sunlight

The WIN PANELS system is perfect for your home, terrace, one of our pergolas, or within your business. Its extensive configuration options will meet all requirements and enhance privacy. Scan the code to learn more about our panel system.

LIGHTING

Our range includes various options for integrated pergola lighting.

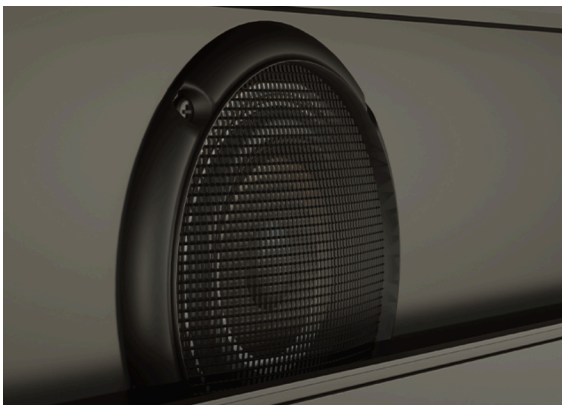

Depending on the model, we offer:

- Linear lighting in the louvers or wind-resistant beams of the roof,
- Spot lighting in the louvers or wind-resistant beams of the roof,
- LED lamps in the louvers or wind-resistant beams of the roof,
- Ambient lighting in the pergola's crown,
- Spot lighting in the pergola's crown,
- Vertical, double lamps in the support column.

HEATERS

For user convenience, we offer two types of heaters: single units with a power of 1500 W and double units with a power of 4000 W. Depending on the choice, the heaters come with either an ON/OFF function or a continuous temperature adjustment feature. Additionally, the heaters include a LOW GLARE function, which significantly reduces the amount of light emitted. Regardless of the model, heaters are available in white or black.

AUDIO SYSTEM

Do you love music and value the aesthetics of your space? Perfect! Enhance your pergola with an integrated audio system consisting of two waterproof speakers with a total power of 50 W. The audio set includes an AUDIO BLUETOOTH central unit, which allows you to control the system via an app on your smartphone or tablet. The speakers are weather-resistant and do not need to be removed, for example, during the autumn and winter seasons.

ELECTRICAL SOCKETS

Elegant and practical electrical sockets integrated into the support column. Eliminate clutter from your pergola's wiring. By installing electrical sockets, you can easily power appliances or charge mobile devices without the need for extension cords. We offer 230 V sockets in IP 54 class or double USB 2 A sockets in IP 65 class.

WEATHER AUTOMATION

Ensure safety by equipping your pergola with available weather sensors. Full protection is provided by wind, rain, snow, temperature, sun sensors, as well as solar-wind sensors. By using reliable weather automation solutions, you don't have to worry about the weather. This effective form of pergola protection guarantees safe use of the product for many years.

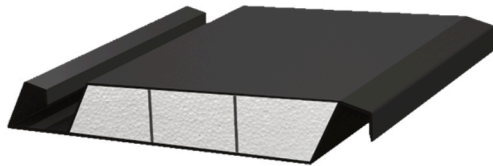

REMOTE CONTROLS

The most extensive range of remote controls on the market. Depending on your needs, choose the right remote and easily control all the functions of your dream relaxation area. We offer remotes with 1-99 channels.

INTELLIGENT CONTROL UNITS

Equip your pergola with a Wi-Fi or Bluetooth control unit. We offer a wide range of intelligent control options for all pergola functions, allowing users to manage devices from their phone, tablet, laptop, or desktop computer.

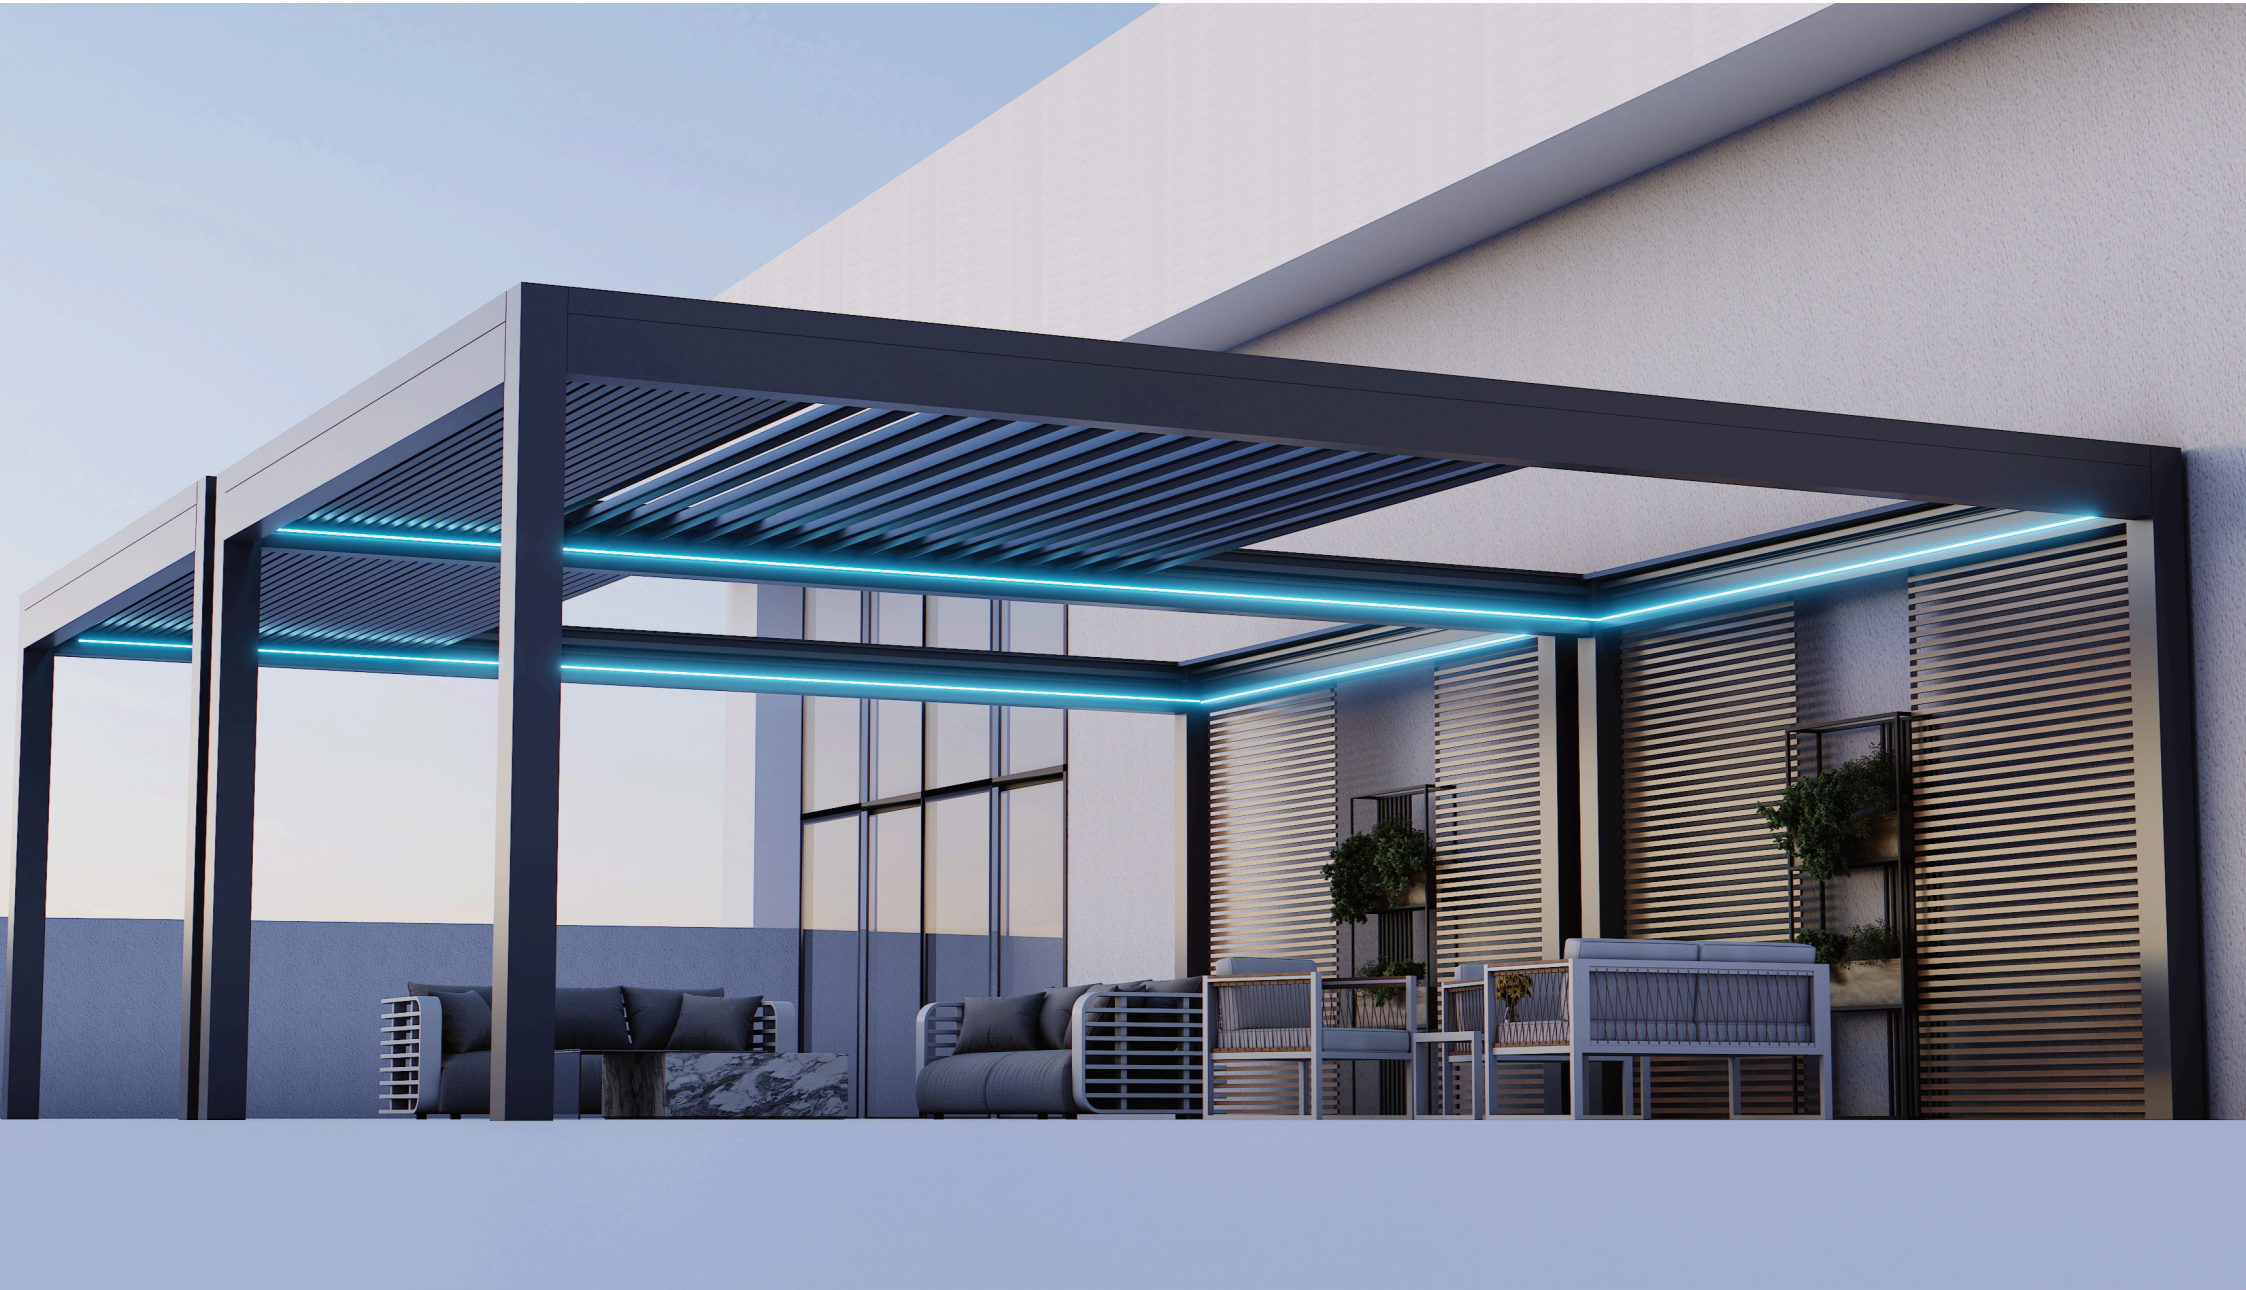

THERMAL INSULATION INSERT

By using a thermal insulation insert, you can significantly enhance the acoustic and thermal properties of your pergola. Ensure additional protection against heating during hot summers and maintain thermal comfort in the winter. The extra insulation will also greatly improve the pergola's acoustics by reducing the sound of rain.

EXTENSIVE COLOR RANGE

Regardless of the chosen pergola model or side screens, we offer our customers a wide range of colors for the structure, fabrics, and glass. Our selection caters to even the most demanding clients, allowing for any type of space arrangement.
